Profile

Fourth-year engineering student at ISEN Ouest with a background in networks and telecommunications, seeking a 4 to 6-month engineering internship starting May 2027. My experiences in network administration and IT support have allowed me to develop skills in DNS/DHCP, IPAM, and network diagnostics. I am currently expanding this technical foundation through cybersecurity projects, CTFs, and TryHackMe labs.

Technical Skills

- **Cybersecurity:** Log analysis and event detection, traffic analysis with Wireshark and Tcpdump, network reconnaissance with Nmap; basic knowledge of SIEM, IDS/IPS, and network filtering
- **Networks & Systems:** TCP/IP, IPv4 addressing, routing, VLAN, DNS, DHCP, Windows 10/11; basic knowledge of Active Directory
- **Development & Automation:** Embedded Linux, Python, Bash, PowerShell, SQL, and C/C++
- **Web Development:** HTML/CSS, JavaScript, and PHP; basics of Java
- **Tools & Methods:** Git/GitHub, Scrum, technical documentation, Life Cycle Assessment (LCA), and eco-design

Education

ISEN Ouest – Caen, France 2025 – 2028
General Engineering Program – 4th year
Planned 5th-year specialization: Cybersecurity, Networks & Systems

Institut des Techniques Avancées – Libreville, Gabon 2024 – 2025
Vocational Bachelor's degree in Networks and Telecommunications (R&T)

École Polytechnique de Libreville – Libreville, Gabon 2022 – 2024
Two-year University Diploma (DUT) in Electrical Engineering and Industrial Computing (GEII)

Professional Experience

Network Administrator Assistant — GABON TELECOM (Moov Africa) June 2025 – Sept. 2025
- Participated in integrating EfficientIP SOLIDserver to centralize DNS, DHCP, and IPAM services management.
- Analyzed the existing architecture, prepared a test environment, and participated in validating DDI modules.
- Performed on-site interventions: network incident diagnostics, switch installation, and workstation configuration.

IT & Proximity Support Technician — Airtel Gabon Nov. 2024 – Dec. 2024
- Deployed and configured over 10 Windows 10/11 workstations in a corporate environment.
- Performed hardware and software diagnostics, replaced defective components, and provided technical support to users.

Electrical Distribution Engineering Assistant — Société d'Énergie et d'Eau du Gabon (SEEG) July 2024 – Nov. 2024
- Sized a primary substation for a business district and elaborated power balances for installation security.

Technical Projects

Mini-SIEM for System Log Analysis — Python 2026
- Extracted IP addresses, counted events by source, and detected repeated attempts from system logs.
- Normalized logs, applied detection rules, and generated security alerts.

National EV Charging Network Analysis Application — Python, R, PHP, JS, HTML/CSS 2026
- Developed an interactive web visualization application for the EV charging network as part of a team.
- Big Data & AI Pipeline: data cleaning and infrastructure classification using clustering (K-means).

Embedded Thermal Simulation System — C, STM32 2026
- Developed in C on STM32 and implemented I2C communication for data acquisition.

Languages, Soft Skills & Interests

Languages: French (Native) | English (B1), technical documentation comprehension

Soft Skills: Rigorous | Analytical mind | Team player

Commitments: ISEN Ouest Ambassador | International Club | Charity fundraiser participant

Interests: Cybersecurity (CTFs, TryHackMe) | Amateur club football | Reading (Shonen, Seinen manga)
