Joas Erwen MVOUMA

ENGINEERING STUDENT | ELECTRONICS & EMBEDDED SYSTEMS

Seeking a 4 to 6-month engineering internship starting May 2027

Profile

Fourth-year engineering student at ISEN Ouest with a background in Electrical Engineering and Industrial Computing (DUT), I am developing skills in electronics, embedded programming, and signal processing. Through my projects, I have implemented an STM32 microcontroller, I2C communication, wiring and soldering operations, as well as signal analysis using MATLAB. I am seeking an internship in electronics, embedded systems, or IoT.

Technical Skills

- **Embedded Systems:** STM32, C/C++ programming, I2C communication, board-to-board communication; basic knowledge of Embedded Linux
- **Electronics:** SMD and through-hole components, wiring, soldering, schematic reading, circuit modeling
- **Signal Processing & Scientific Computing:** MATLAB, signal generation, visualization and analysis, time and frequency domain analysis
- **Electrical Engineering & Energy:** Sizing of electrical infrastructures, power balance calculations, energy storage technologies
- **FPGA & Digital Logic:** Basic knowledge of Quartus and logic circuit design
- **Development:** C/C++, Python
- **Tools & Methods:** Git/GitHub, Scrum, technical documentation, Life Cycle Assessment (LCA), eco-design

Education

ISEN Ouest – Caen, France 2025 – 2028
General Engineering Program – 4th year

Institut des Techniques Avancées – Libreville, Gabon 2024 – 2025
Vocational Bachelor's degree in Networks and Telecommunications (R&T)

École Polytechnique de Libreville – Libreville, Gabon 2022 – 2024
Two-year University Diploma (DUT) in Electrical Engineering and Industrial Computing (GEII)

Technical Projects

Embedded Thermal Simulation System — C, STM32, I2C 2026

- Developed in C on an STM32 microcontroller, performed data acquisition and processing, and implemented board-to-board I2C communication.

Assembly and Validation of an Analog Electronic Board 2026

- Assembled and soldered SMD and through-hole components, performed electrical tests, and wrote an acceptance test protocol for hardware validation.

Digital Signal Processing and Analysis — MATLAB 2026

- Completed a series of practical works covering the generation, visualization, and time-frequency domain analysis of signals.

Professional Experience

Electrical Distribution Engineering Assistant — SEEG July 2024 – Nov. 2024

- Sized a primary substation and performed power balance calculations to supply a business district.

Network Administrator Assistant — GABON TELECOM (Moov Africa) June 2025 – Sept. 2025

- Participated in integrating EfficientIP SOLIDserver and performed network configuration and diagnostic interventions.

IT & Proximity Support Technician — Airtel Gabon Nov. 2024 – Dec. 2024

- Deployed and configured Windows 10/11 workstations, performed hardware diagnostics, and replaced defective components.

Languages, Soft Skills & Commitments

Languages: French (Native) | English (B1), technical documentation comprehension

Soft Skills: Rigorous | Analytical mind | Team player

Commitments: ISEN Ouest Ambassador | International Club: drafting communications and emails

Interests: Electronics & IoT | Amateur club football | Reading (Shonen, Seinen manga)
