Joas Erwen MVOUMA

ENGINEERING STUDENT | DATA, AI & AUTOMATION

Seeking a 4 to 6-month engineering internship starting May 2027

Profile

Fourth-year engineering student at ISEN Ouest, with a background in networks and telecommunications, I am developing skills in data analysis, Machine Learning, and Python automation. Through my projects, I have implemented ETL pipelines, regression and clustering models, as well as optimization algorithms. I am seeking an internship in Data, AI, or automation applied to technical systems.

Technical Skills

- **Data & Machine Learning:** Data preparation and analysis, linear regression, K-means clustering, Pandas, NumPy, Scikit-learn
- **Data Visualization & Processing:** Matplotlib, Folium, ETL pipelines, SQL, SQLite
- **Signal Processing & Scientific Computing:** MATLAB, signal generation, visualization and analysis, time and frequency domain analysis
- **Mathematics & Optimization:** Probability, statistics, operations research, greedy algorithms, simulated annealing
- **Development:** Python, R, SQL, C/C++, Java
- **Web Development:** HTML/CSS, JavaScript, PHP
- **Tools & Methods:** Git/GitHub, Linux, Scrum, technical documentation, Life Cycle Assessment (LCA), eco-design

Technical Projects

National EV Charging Network Analysis Application — Python, R, Folium, PHP, JavaScript 2026

- **Web Segment:** Team development of an interface incorporating interactive maps with Folium to visualize charging station distribution.
- **Data & AI Segment:** Designed an ETL pipeline to clean and analyze 184,505 records, followed by infrastructure classification using K-means clustering.

Data Pipeline and Trading Simulator — Python, C, SQLite 2026

- Designed an ETL pipeline using Python and SQLite to collect, transform, and store financial data.
- Used linear regression to generate predictions, then developed a transaction execution simulator in C.

3D Container Loading Optimization — Python 2026

- Modeled a 3D Bin Packing problem and compared greedy algorithms with simulated annealing based on fill rate and execution time.

Education

ISEN Ouest – Caen, France 2025 – 2028
General Engineering Program – 4th year

Institut des Techniques Avancées – Libreville, Gabon 2024 – 2025
Vocational Bachelor's degree in Networks and Telecommunications (R&T)

École Polytechnique de Libreville – Libreville, Gabon 2022 – 2024
Two-year University Diploma (DUT) in Electrical Engineering and Industrial Computing (GEII)

Professional Experience

Network Administrator Assistant — GABON TELECOM (Moov Africa) June 2025 – Sept. 2025

- Participated in integrating EfficientIP SOLIDserver to centralize DNS, DHCP, and IPAM services management.
- Analyzed the existing architecture, prepared a test environment, and participated in validating DDI modules (DNS, DHCP, and IPAM).

IT & Proximity Support Technician — Airtel Gabon Nov. 2024 – Dec. 2024

- Deployed and configured over 10 Windows 10/11 workstations, performed hardware and software diagnostics, replaced components, and assisted users.

Electrical Distribution Engineering Assistant — Société d'Énergie et d'Eau du Gabon (SEEG) July 2024 – Nov. 2024

- Sized a primary substation and performed power balance calculations to supply a business district.

Languages, Soft Skills & Interests

Languages: French (Native) | English (B1), technical documentation comprehension

Soft Skills: Rigorous | Analytical mind | Team player

Commitments: ISEN Ouest Ambassador | International Club | Charity fundraiser participant

Interests: AI technology watch | Amateur club football | Reading (Shonen, Seinen manga)
